

JAMMIE-ANN MATTHIAS

New York, NY | jammieannm2@gmail.com | +1 (845) 996-3260 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

TECHNICAL SKILLS

Languages: Python, Java, SQL

Frontend: React, Bootstrap, HTML/CSS/JavaScript/Typescript

Backend: Spring Boot, REST API, NodeJS, Express, FAST API

Databases: PostgreSQL, MongoDB

DevOps & Tools: Docker, Git, GitHub

Familiar with: Linux, C++

TECHNICAL PROJECTS

Finance Tracker & AI Insight Generator

React, Bootstrap, Spring Boot, PostgreSQL, Firebase, REST API, NodeJS, Gemini API

- Designed and implemented a full-stack finance application with real-time data processing and AI-generated insights
- Built and integrated RESTful APIs to manage user data and financial analytics
- Structured and managed PostgreSQL database schemas, optimizing data storage and retrieval

Multilingual Chatbot & Iris Classifier

Python, Gemini API, TensorFlow, Scikit-learn

- Created a real-time chatbot that translates between world languages using Gemini 2.5 Flash API.

In the Face of Catastrophe

HTML, Bootstrap, JS, CSS

- Designed a nonprofit website promoting emergency preparedness and mental health resources to align with the org's mission.

EDUCATION

Pace University, Seidenberg School of Computer Science and Information Systems

Pleasantville, NY

B.S. in Computer Science -- May 2026 | Honors: Dean's List First & Second Honors, Tau Sigma | GPA: 3.89

RELEVANT COURSEWORK

Data Structures | Object Oriented Programming | Algorithms and Computing Theory | Java Programming | Biology 101 & 102 | Genetics | Neurobiology | Artificial Intelligence | Web Design | Advanced Web Programming | Database Concepts | Python Programming | Internet and Distributed Computing

PROFESSIONAL EXPERIENCE

ITS Helpdesk Representative

September 2025 — Present

Pace University

- Delivered Tier 1 technical support across phone, chat, email, and in-person channels, resolving user issues related to accounts, connectivity, and university systems
- Troubleshooted and resolved issues involving Active Directory, VPN access, MFA (DUO), email, and learning platforms (Brightspace, Pace Portal)
- Managed and triaged support tickets using TDX (TeamDynamix), ensuring accurate documentation, prioritization, and timely escalation
- Utilized remote support tools to diagnose and resolve technical issues for both on-campus and remote users
- Created and maintained technical documentation and self-service resources to improve support efficiency and user experience

Artificial Intelligence Developer Intern

June 2025

Pace University

- Implemented end-to-end AI apps using Gemini APIs, including a multilingual translator chatbot.
- Applied prompt engineering and real-time data handling to generate user-specific responses.
- Led model development using Python, TensorFlow, Pandas, and Scikit-learn; presented group results to academic mentors.
